

Sunset Foods has learned that one of our team members at our Northbrook store has been diagnosed with COVID-19. We send our thoughts to our valued member of the Sunset family for a full and smooth recovery.

Privacy for this individual remains a priority. However, it's important that we remain transparent with our communities and share how we are addressing this. Friday, April 10th was the last day this staff member was in store. We were informed today, April 15th, of the positive test.

Adhering to the Cook County protocol, the store has closed immediately to be thoroughly cleaned. The store will be sterilized by a company that specializes in sanitation for this virus. Tomorrow, April 16th, the Northbrook store will resume business with regular operating hours at 7 am - 8 pm.

We continue to follow the CDC guidelines as well as communicate with local health departments to respond responsibly. In all of our locations, we continue rigorous sanitation exercises and responsible social distancing practices.

**We will get through this together.**

John Cortesi
